About me

I am a motivated Data Science and Artificial Intelligence student. Besides coding, my hobbies include playing soccer, going for a run, grabbing drinks with friends and watching the Lord of the Rings for the n-th time.

Skills

Javascript (Vue/React)

Python

MySQL

Java

Scrum, Agile

(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

Education

2021-present	student Data Science and Artificial Intelligence
	Master, Eindhoven University of Technology
2018-2021	student Computer Science — Bachelor, Eindhoven University of Technology
	Bachelor
2012-2018	Gymnasium — Augustinianum
	Gymnasium is the highest educational level in the Netherlands (vwo), with Latin and/or ancient Greek

Experience

T.S.V. Plato — Functionaris Vereniging — September 2023 - Present

As Functionaris Vereniging at student association Plato, I am responsible for most of the committees that Plato has, which means I am in contact with a lot of our members to organise activities. I am also responsible for our building, so I am in contact with a lot of external parties for maintenance. Lastly, all 7 of us are responsible for every big decision we make.

TextKernel — Full-Stack developer — December 2022 - December 2023

TextKernel is a company that uses AI to improve insights into the job market and provide solutions for staffing, recruitment and HR processes.

Coosto — Full-Stack developer — October 2020 - December 2022

Coosto is a social media platform. Coosto does not only bring online data insights, they also make the data understandable. Languages and frameworks used here include Python (Django), Vue.js, React.js and more.

Coosto — Script Developer — October 2019 - October 2020

My role as Script Developer within Coosto was to write the scripts that gather data. To do this, I use Python, XPath and Regex.

Tapperij de Zwaan — Bartender — October 2010 - June 2015

Started as a dishwasher, then after a year got promoted to bartender. Very sociable environment, in which I have had to learn to deal with pressure and complaints, and to work together with my colleagues, and to take the lead.

Other information

About me

I am an organized and highly motivated master student and full-stack developer, with aspirations to become an AI specialist. Furthermore, I love cooking and talking about my favourite movies and series! To find out more, please visit my portfolio website here!
